

# **ENTERPRISE SYSTEM DEVELOPMENT (SSE4354)**

## **LAB DOCUMENTATION: JSP PRACTICAL**

**NAME: IYLIA YASMIN BINTI SHAMSUL**

**MATRIC NO.: 195890**

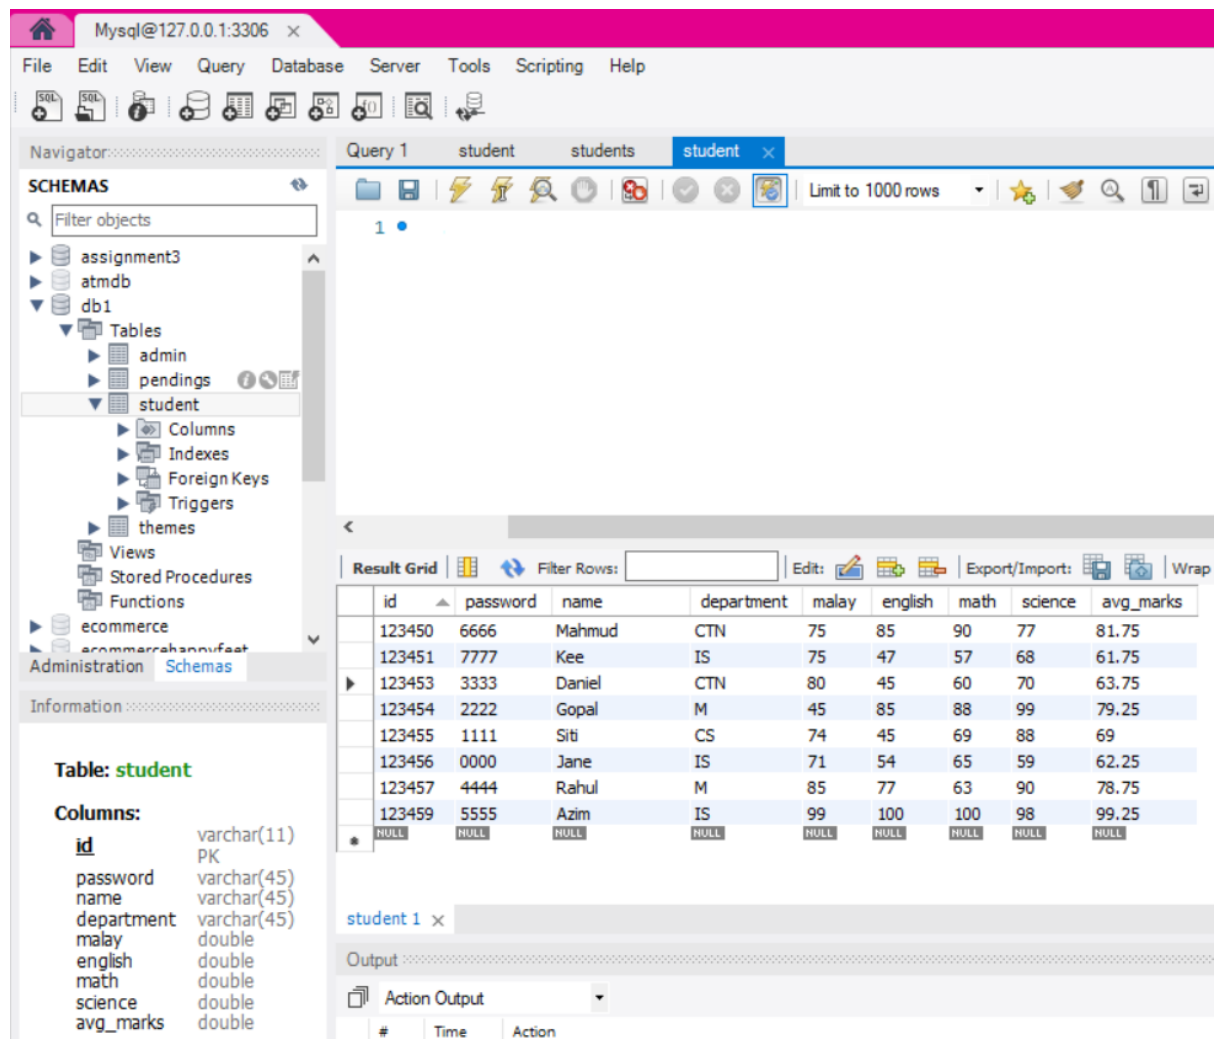

**GROUP NO.: 1**

**LECTURER: PROF. MADYA DR. MARZANAH A. JABAR**

**LAB INSTRUCTOR: MR MAHMOUD**

The program is written in JAVA based on JDBC Practical with extended functionalities and the implementation of Java Server Page (JSP) for controlling the content/appearance of the Web pages through the use of servlets. The program also implemented Java Database Connectivity (JDBC) as the MySQL Driver for database connectivity with MySQLWorkBench 8.0 CE and used Apache Tomcat Server 7.0 to implement the JSP.

### Database: MySQLWorkBench 8.0 CE

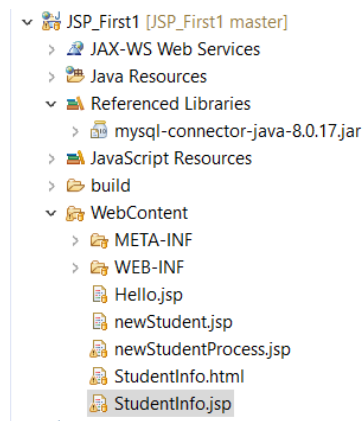

The screenshot shows the MySQL Workbench 8.0 CE interface. The left sidebar displays the 'SCHEMAS' tree with 'db1' selected, showing the 'student' table. The main window displays the 'student' table in the 'Result Grid' view. The table has the following columns: id, password, name, department, malay, english, math, science, and avg\_marks. The data is as follows:

id	password	name	department	malay	english	math	science	avg_marks
123450	6666	Mahmud	CTN	75	85	90	77	81.75
123451	7777	Kee	IS	75	47	57	68	61.75
123453	3333	Daniel	CTN	80	45	60	70	63.75
123454	2222	Gopal	M	45	85	88	99	79.25
123455	1111	Siti	CS	74	45	69	88	69
123456	0000	Jane	IS	71	54	65	59	62.25
123457	4444	Rahul	M	85	77	63	90	78.75
123459	5555	Azim	IS	99	100	100	98	99.25
NULL	NULL	NULL	NULL	NULL	NULL	NULL	NULL	NULL

A database with connection name of db1 is used for this program based on JDBC Practical. In db1, a table named Student has been created with columns of id, password, name, department, malay, english, math, science and avg\_marks. Each of the columns were filled in with data based on data submission of add new student form in NewStudent.java class inside the program.

## Java Project: Eclipse

The Java project is created in Eclipse with the name of JSP\_First1 with mysql-connector-java-8.0.12.jar as the MySQL Driver for database connectivity. 4 JSP and 1 HTML page are created under JSP\_First1 which are Hello.jsp, StudentInfo.jsp, newStudent.jsp, newStudentProcess.jsp and StudentInfo.html.

## Hello.jsp class

### Code in Eclipse:

```
1 <%@ page language="java" contentType="text/html; charset=ISO-8859-1"
2   pageEncoding="ISO-8859-1"%>
3 <!DOCTYPE html PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN" "http://www.w3.org/TR/html4/loose.dtd">
4 <html>
5 <head>
6 <meta http-equiv="Content-Type" content="text/html; charset=ISO-8859-1">
7 <title>Login System</title>
8 </head>
9 <body>
10 <h1>Welcome User</h1>
11 </body>
12 </html>
```

### Output of the code:

## Welcome User

---

“Welcome User” is displayed in Hello.jsp page.

## Student JSP

Based on JDBC Practical, the program is extended with JSP implementation and to add more functionalities of:

- Get average student marks for Malay, English, Math and Science – StudentInfo.jsp

```
1 <%@ page import="java.io.*,java.util.*,java.sql.*"%>
2
3 <%@ page language="java" contentType="text/html; charset=ISO-8859-1"
4   pageEncoding="ISO-8859-1"%>
5 <!DOCTYPE html PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN" "http://www.w3.org/TR/html4/loose.dtd">

### c. Login – StudentInfo.html

```

Hello.jsp | newStudent.jsp | StudentInfo.jsp | StudentInfo.html | newStudentProcess.jsp
1  <!DOCTYPE html>
2  <html>
3  <head>
4  <meta charset="ISO-8859-1">
5  <title>Login System</title>
6
7  <script>
8  //input validation using javascript
9  function validate() {
10     if(document.getElementById('id').value==''){
11         alert('Student ID is compulsory.');

```

## Output:

## Welcome to Student Information System

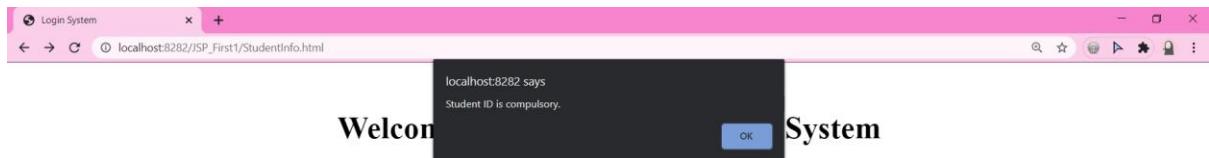

### Login System

Student ID:

Password:

---

The application starts with StudentInfo.html. User needs to login with Student ID and password correctly as in the Student table in database db1 in order to access the system.

## Welcome to Student Information System

### Login System

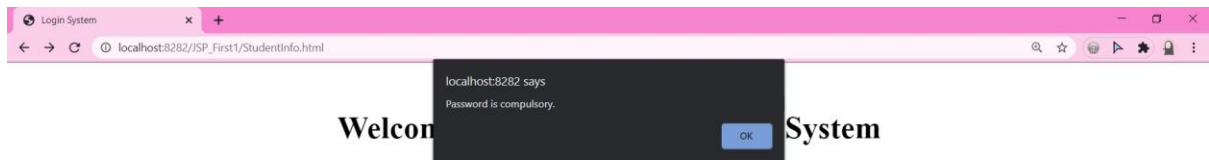

Student ID:

Password:

---

If user did not enter any Student ID, a message will be alerted to the user that Student ID is compulsory to have a successful login.

---

If user did not enter any password, a message will be alerted to the user that password is compulsory to have a successful login.

---

For unsuccessful login, an error message of “Login failed!” will be displayed with a link for the user to login again.

Student Portal

localhost:8282/JSP\_First1/StudentInfo.jsp

Hello 123456 , your password is 0000

Add New Student

Student ID	Name	Department	Malay	English	Science	Math	Average Marks
123450	Mahmud	CTN	75.0	85.0	77.0	90.0	81.75
123453	Daniel	CTN	80.0	45.0	70.0	60.0	63.75
123454	Gopal	M	45.0	85.0	99.0	88.0	79.25
123455	Siti	CS	74.0	45.0	88.0	69.0	69.0
123456	Jane	IS	71.0	54.0	59.0	65.0	62.25
123457	Rahul	M	85.0	77.0	90.0	63.0	78.75
123459	Azim	IS	99.0	100.0	98.0	100.0	99.25

If the user has successfully login to the system, StudentInfo.jsp will be displayed. In StudentInfo.jsp, a welcome message with Student ID and password are displayed at the top of the page. There is an Add New Student button for user to click if user wants to add new student into the system. A list of all students in the Student table in database db1 with their respective Student ID, Name, Department, Malay, English, Science, Math and Average Marks are displayed in a table inside the page. The marks for Malay, English, Science and Math for each student are calculated in StudentInfo.jsp by retrieving the data for each mark in the database and calculating the average based on the data retrieved to display it under Average Marks column.

Register New Student

Student ID:

Password:

Name:

Department(CTN/M/CS/IS):

Malay:

English:

Math:

Science:

Submit

If user clicks on Add New Student Button in StudentInfo.jsp, newStudent.jsp will be displayed. Inside newStudent.jsp, a form to register new student is provided. User needs to enter Student ID, Password, Name, Department (CTN/M/CS/IS), Malay, English, Math and Science marks in order to submit the form. Once the Submit button is clicked, the form is submitted and all of the data are kept in the Student table in db1 database.

Student Portal							
localhost:8282/JSP_First1/newStudentProcess.jsp							
1 row(s) changed							
New updated table:							
Add New Student							
Student ID	Name	Department	Malay	English	Science	Math	Average Marks
123450	Mahmud	CTN	75.0	85.0	77.0	90.0	81.75
123451	Kee	IS	75.0	47.0	68.0	57.0	61.75
123453	Daniel	CTN	80.0	45.0	70.0	60.0	63.75
123454	Gopal	M	45.0	85.0	99.0	88.0	79.25
123455	Siti	CS	74.0	45.0	88.0	69.0	69.0
123456	Jane	IS	71.0	54.0	59.0	65.0	62.25
123457	Rahul	M	85.0	77.0	90.0	63.0	78.75
123459	Azim	IS	99.0	100.0	98.0	100.0	99.25

When user has successfully submitted the form, newStudentProcess.jsp will be displayed. A message of number of row(s) changed indicates of how many changes has been made into the student table based on row. Since the changes are only for one row, which is inserting a new student information for Student table, therefore only 1 row has changed being displayed. A new updated table with the new student information is also displayed in the page. For example, a student named Kee with a student ID of 123451 has been added into the database and being displayed in the table.
